

CLARUS EYE CENTRE

A Mountain Construction Health Care Project

Regional Eye Care Facility Combines Clinic, Surgery Center & Retail Optical Shop

Your Future in Sight is at Clarus Eye Centre's regional care facility at the corner of 3rd and College in Lacey, across from Lacey City Hall.

The new state-of-the-art facility sets a new standard for patient convenience and comfort.

Before their new facility was complete, Clarus operated out of two separate locations in the Olympia area which moved to the College Street location upon completion.

The new facility features 25 examination and testing rooms, three surgical suites, a large multipurpose/training room

and ample parking for patients. In addition to the most advanced eye-care technology available, the new facility will serve as a regional teaching facility for other eye-care professionals

Mountain Construction was selected for the project team in a competitive submittal and interview process involving qualifications and fees/rates.

Clarus Eye Centre provides services ranging from routine eye examinations to the treatment of cataracts, glaucoma, and macular degeneration.

Fellowship-trained surgeons perform cornea, cataract and refractive surgery, including LASIK.

Completed February 2006
